Academic Projects

Title	: Riders Point
Platform	: J2EE,MySQL,React

Duration : 1 Month

Description	: Designed and developed Riders Point, a communication platform facilitating group travel experiences for riders and pillions. The application enables users to plan, share, and join group rides, allowing individuals without a bike to partake in shared travels. It includes functionalities such as route planning, ride sharing via phone numbers, user profiles. Key features involve route setting, ride sharing, user communication, and profile management through unique login credentials.
Project Repository	: https://github.com/Varadrajj/Riders-Point.git
